

Management Plans

Translating the findings of the ESIA into actions

The ESIA assesses the Amulsar Gold Project's environmental and social impacts, and derives the mitigation and management measures necessary to avoid, minimise and control the impacts and risks. The final chapter of the ESIA is the Environmental and Social Management Plan (ESMP), which is designed to put into practice the outcomes of the assessment process.

The ESMP contains a series of coordinated management plans aligned with Lydian policies and procedures which define the practical actions necessary to implement the mitigation measures. It is the ESIA policy-setting document and represents Lydian's commitment to environmental and social sustainability throughout the Project life cycle.

The ESMS

The ESMP will be implemented via Lydian's existing Environmental and Social Management System (ESMS), which was set up in line with the ISO-14001 standard and provides the organisational framework through which continuous improvement in environmental and social performance can be assured. A specific ESMS is being developed for construction.

The component Management Plans

- Stakeholder Engagement Plan
- Occupational Health and Safety Plan
- Footprint Management Plan
- Emergency Preparedness and Spill Response Plan
- Transport Plan
- Cyanide Management Plan
- Environmental Monitoring Plan
- Solid Waste Management Plan
- Air Quality, Noise and Vibration Management Plan
- Community, Health and Safety Plan
- Community Development Plan
- Cultural Heritage Management Plan
- Preliminary Mine Reclamation, Closure and Rehabilitation Plan
- Acid Rock Drainage Management Plan
- Biodiversity Action Plan
- Biodiversity Management Plan
- Surface Water Management Plan
- Land Access and Livelihood Restoration Plan
- Carbon and Energy Management Plan
- Worker Accommodation Management Plan
- Contractor Management Plan
